Rethink inkjet.

Experience the difference with this ultra-fast compact printer that really delivers.

The power of inkjet. Ultimate speed and efficiency.

Inkjet printers require no heat when printing unlike laser printers. ComColor FW5000 boasts ultra-fast print speed combined with a fast first print time to streamline printing, helping make busy work environments more efficient. Its ultimately low power consumption prevents paper from curling to reduce paper jams. And because output requires no cooling, pages can be sent immediately after printing to any of your optional finishers, vastly reducing production times.

Advancements all around

High productivity for any workplace.

With print speeds at 90 ppm, duplex scanning and a rich feature set, ComColor FW5000 brings a new level of productivity to any workplace. You'll also appreciate its modest footprint — the ideal choice where space is at a premium. Affordable on-demand, full-color printing ensures smooth operation to increase efficiency.

Superb efficiency for high volume printing.

ComColor FW5000 is the right choice for low-cost color printing. Superb high-speed output combines with outstanding flexibility for cost-efficient in-house printing. It also goes easy on the environment thanks to the energy-saving design.

* At 40 ppm

Duplex printing shares this efficiency, reaching up to 90 ppm. Thanks to high-precision paper-feed control, ComColor FW5000 prints at the same speed for both simplex and duplex documents to boost productivity. The responsive first print time of only 5 seconds means less waiting for both short print runs and high-volume jobs. The optional one-pass duplex scanner drastically enhances processing speed for scanning. You can load up to 200 sheets for quick scanning and copying of large documents.

Compact design to fit any workplace

The compact print head and tray-free design make for a small footprint, allowing installation of ComColor FW5000 almost anywhere.

Comparison with previous ComColor model

Cubic measurement **8% smaller**

Footprint **11% smaller**

Note: Approximate measurements

Two paper-feed trays are easily accessible and hold 500 sheets* each while the standard tray handles 1,000 sheets*. This equals a paper capacity of 2,000 sheets* in a slim body.

Reliability

The RISO inkjet advantage – FORCEJET technology
Your assurance of quality and reliability

Instant-drying ink complements the high-speed, duplex printing capability. This specially developed, oil-based ink is also fade-resistant and water-resistant, and minimizes paper curling. Stable paper feeding ensures the reliable performance necessary for high-speed printing. Paper-feed speed is intelligently controlled according to how much ink is emitted from the print head. Also, multiple sensors help ensure high levels of reliability.

ENGINE TECHNOLOGY
FORCEJET™

Durability

Tough body for reliable operation

High-speed, high-volume printing requires a durable body. ComColor FW5000 is tough enough to print millions of sheets.

Dimensions

Low-cost color printing

ComColor Standard — RISO's original color profile — accurately controls the amount of ink ejected from the print head depending on document type and media. This maintains image quality and optimizes ink usage, ultimately lowering operating costs. Short print runs can now be performed inexpensively and efficiently in-house.

On-demand, full-color printing

White paper solution decreases waste, as it allows printing on-demand as and when required. ComColor FW5000 also supports variable-data printing, eliminating the need for pre-printed stock. Less outsourcing shortens turnaround time and lets you make last minute changes to documents.

Intelligent design for flexibility and efficiency

A simple paper-feed mechanism with no heating function supports a wide range of media, from plain paper and envelopes to cards. Paper is less likely to curl as no heat is applied during printing, thereby minimizing paper jams. Operation time can be reduced for long print runs by inserting slip sheets to facilitate sorting, add covers and program printing.

The energy-efficient printing process offers smooth, economical operation. Unlike toner-based printers, ComColor FW5000 employs an imaging process that eliminates ozone and toner emissions.

More energy-saving functions

Power schedule mode

This function allows you to automatically turn on and off the power of the machine at a specified time. Up to 10 sets of combinations of start or end time and day of the week can be registered. Never worry about forgetting to turn the printer off after working hours or over the weekend.

Sleep mode

Set when the printer enters sleep mode after the last print job to further decrease power consumption. This mode keeps power consumption to a miniscule 4W, further enhancing savings on electricity bills.

ECO-PROVEN PERFORMANCE WORLDWIDE

ComColor's acquisition of and compliance with various environmental labels and directives from around the world are your assurance of the green performance. The following labels and directives apply to the ComColor FW series.

BLUE ANGEL

The Blue Angel is the German government's label for environmentally friendly products and services. As the first environmental label worldwide, it has stood for independence and credibility for over 35 years as an eco-label you can trust. (ComColor FW5000 has acquired the Blue Angel in Germany.)

EPEAT

The definitive global rating system in the United States for greener electronics. EPEAT (Electronic Product Environmental Assessment Tool) combines comprehensive criteria with ongoing independent verification of manufacturer claims, across the broadest range of products and sectors. (ComColor FW5000 is EPEAT Silver rating registered in the United States.)

ENERGY STAR® Program

An international program that promotes energy saving in office machines. The program sets standards in terms of the power consumption of office machines in each of the operation, sleep and OFF modes*.

*Varies according to region.

Excellent usability for every work environment.

Designed for simple operation

An easy-to-view touch panel with instantly recognizable color icons makes printer operation simple for anyone. The tilt panel ensures excellent viewing at any angle up to 90 degrees, expanding installation flexibility. Scan preview windows show scanned images before saving data, ensuring less scan failures. For added convenience when printing and copying, frequently used functions can be saved as Favorites.

Expanded usability

The optional PS kit supports a variety of operating systems, and PDF files can be printed directly from USB flash drives, while RISO Print-S application allows printing from smart devices. ComColor FW5000 offers reliable support for any work environment.

ComColor functions and output modes

Useful scanner functions

The optional Scanner HS7000 can save scanned data over the network to a PC, as an attachment to e-mail, or onto a hard disk of a networked RISO machine. Multi-page documents can be saved in PDF format as either separate files or combined into one file. Documents can be saved as PDF, TIFF, JPEG and PDF/A (suitable for long-term storage) formats.

Easy management for administrators

Up to 1,000 users can be registered. Connecting to an internal directory with LDAP authentication ensures quick configuration for a large number of users. The optional IC Card Authentication Kit enables user management using an IC card. Other maintenance tasks can be performed simply and speedily.
